Manfrotto
Imagine More

Italian genius. International vision.

From its creation in 1972 until now, Manfrotto has evolved, establishing itself in the world of high-quality photography accessories as a synonym of continuous innovation, great design and extreme reliability.

Born in Bassano del Grappa, Italy, from the intuition of a young photographer called Lino Manfrotto, the company has excelled in nurturing its founder's flair for research and innovation, never ceasing to conquer new market segments, building a solid distribution network and multiplying production facilities in the heart of a local manufacturing ecosystem that has proven its ability to evolve and drive change.

World leading design. Cutting-edge technology. Continuous innovation. Operational excellence.

Recognised as a symbol of design excellence around the world.

One of the most sought-after quality marks for good design.

The photography industry's most important award. Journalists from leading photo and imaging magazines award the very best products.

An excellent idea is easy to recognise.

We believe that our ideas can shape your passion. This is why Manfrotto constantly strives to improve its own standards, inventing creative and functional solutions that turn ideas into reality. The numerous awards Manfrotto products are granted each year bear witness to this innovation process. Design, functionality and technology are what makes our products special and universally recognised as the epitome of excellence in the photographic world.

Continuous innovation, since 1972.
A synonym of outstanding quality.
Pioneering new markets.

From the first tripods to the most sophisticated high tech heads, Manfrotto products have always revolutionised the international photography and video-making markets, setting new paradigms for quality and design.

Today, through smartphones and compact cameras, an ever-increasing audience is taking an interest in this world. iPhone accessories, LED lights and photography bags at the forefront of fashion trends, contribute to an increasingly rich offering that always reflects the style and needs of photographers at all levels.

In order to support the creative community to explore their imagination with the same standards of quality, innovation and design that are usually reserved for professional photography, Manfrotto interprets market evolution using a production culture that is quintessentially Made in Italy, in which quality, design and careful attention to detail combine with constant research and technological innovation.

Precision and technical reliability, blended with the aesthetic and functional elegance of high-end products that are entirely conceived and designed in Italy, are the expression of a unique style that reflects Manfrotto's most authentic soul. Keeping the production of its goods in Italy testifies to the company's commitment to achieving quality that guarantees product functionality and durability over time.

A multidisciplinary team of highly motivated and qualified professionals makes up the company's most precious resource, constantly driving the innovation process and powering the achievement of new technological and production goals.

The goals remain the same: constantly improving the quality and efficiency of both production and service, merging the workforce's extremely high levels of expertise with latest-generation industrial automation. Excellence pursued every day, with a determination, passion and pride for bringing the world the very best Italian quality.

PHOTO SUPPORTS

Photography, both as a profession and as a passion, attracts more people than ever before. At Manfrotto, our aim is to encourage, engage and support every photographer, whatever their level, by providing the practical, reliable and versatile tools that will allow them to capture the best possible images. To develop these tools, we collaborate closely with the world's greatest photographers. Their needs, demands and opinions are behind each new Manfrotto product and feature, and by striving to exceed their expectations through our research, innovation and continuous evolution, we help set the standards that the rest of the industry has to follow.

Whatever your own photographic and videographic background, we hope you'll find this catalogue inspiring and useful. To keep up with all the Manfrotto innovations that are still too new to print, please visit www.manfrotto.com

Tripods

Manfrotto's mission is to develop specific ranges of supports for the particular needs of all customers- taking into account different levels of skill and varied ambitions in photography. Every series has specific characteristics and intended applications, with products differing for every level of performance, features and complexity. However, all of the products share the Manfrotto attitude: to offer the highest level of quality.

055

The 055 is our best-known and most successful tripod for professional photographers; this latest redesign continues to build on the range's heritage, but improves its performance in terms of stiffness and strength and also makes it faster to set-up, easier to use, and more versatile than ever. The 055 is available in 3- and 4-section models, in both aluminum and carbon fiber. Kits are available, matching the tripods with either a versatile ball head, 2 way head and 3 way head.

190

The new 190 is a unique tripod that holds compactness and more transportability together with incredible stiffness. Aimed mainly to hobbyists, it offers ultra-versatile settings that make it easier to release the imagination and creativity of every photographer. The 190 model is Manfrotto's most popular tripod and has become the "pivot" for all the photo-supports range. The 190 is available in 3- and 4-section models, in both aluminum and carbon fiber. Kits are available, matching the tripods with either a versatile ball head, 2 way head and 3 way head.

290

Derived from the success of the 190, the 290 series is ideal for taking your photography skills and your passion to a whole new level. Thanks to highly durable materials, sturdy construction, advanced and versatile settings and a removable head to support future upgrades, the 290 is the ultimate long-term investment.

BEFREE

The Manfrotto Befree tripod has been specifically designed to maximize compactness and portability with no compromise on sturdiness and image quality. Befree is the perfect travel companion, it fits easily into backpacks and carry-on luggage for perfect portability.

COMPACT

The Compact series is devoted to those that are approaching photography for the first time and need a compact, lightweight and easy-to-use support to express their creativity to the fullest.

PIXI

Mini lightweight tripod, easy to set up in seconds, provides a stable base for your next amazing image. It fits easily in your bag and it can be used virtually anywhere, indoors or outdoors.

The new 055 3-section, in its carbon fiber version, delivers maximum rigidity combined with the lightest components. The outcome is a masterpiece of engineering dedicated to all those photographers who want the best from their tripod and want it to be easily transportable. The 100% carbon fiber tubes increase leg rigidity and absorb vibration, stabilizing the equipment under any conditions, and dramatically reducing the weight compared to aluminum tubes.

The 190XPRO3, with its three section aluminum legs, is the right choice for providing high stability even when using long lenses. Its key feature is the 90° column mechanism, which allows the column to be extended vertically as normal, or horizontally to open up a wide range of framing and shooting possibilities; this makes the 190XPRO3 an extremely versatile tripod. Moreover, the limited number of sections cut down the set up time thanks to the comfortable and strong single-handed grip of Quick Power Lock levers that block and unblock each leg section.

The new 190go! M-series is the lightest and most compact travel tripod in the 190 Aluminum range. It mounts the M-lock system, Manfrotto's new twist lock, which allows photographers to set up in a matter of seconds and ensures the highest level of stability. It also comprises the 90° column mechanism, which enables the column to swing to the horizontal position without hindrance and with no components on the outside. It provides 4 leg angles offering a full set of possible tripod configurations that make this model an extremely versatile choice. The Easy link attachment in the top casting turns this tripod into a mobile studio, by allowing it to hold a LED light, reflector or other accessories that maximise the creative potential of your shot.

The new 190go! M-series is the lightest and most compact model of the 190 collection. It mounts the M-lock, the Manfrotto twist lock that allows the photographer to setup the tripod in a matter of seconds while ensuring the highest level of stability and compactness. In its new carbon fiber version, the legs are made to provide the maximum stability while being considerably light. The new M-locks allow the easy opening and closure of all sections at once with a single hand, making it ultra-fast to operate the tripod while ensuring the highest level of stability. An Easy link attachment in the top casting turns the tripod into a mobile studio, enabling it to hold a LED light, reflector or other accessory to maximise the creative potential of your shot.

The Manfrotto Befree advanced tripod is made for all passionate demanding travel photographers looking for a portable tripod that delivers best in class performance. While compactness is a must, every aspect of this model is designed to make set up and operation as smooth and fast as possible, making it the perfect companion for the most challenging shots. Once it's folded, the tripod is only 40cm long (15.7in), the perfect size to fit into hand luggage and backpacks. The Befree advanced features the M-lock system, a twist lock mechanism that ensures the easiest and fast set up with safe stability. The ergonomic leg angle selector can be easily operated with both hands and it allows to choose among three different leg angles, making the befree advanced extremely versatile on the most uneven terrain. Befree advanced comes with its own padded carry bag.

The Manfrotto Befree advanced tripod is made for all passionate demanding travel photographers looking for a portable tripod that delivers best in class performance. While compactness is a must, every aspect of this model is designed to make set up and operation as smooth and fast as possible, making it the perfect companion for the most challenging shots. Once it's folded, the tripod is only 40cm long (15,7in), the perfect size to fit into hand luggage and backpacks. This Befree advanced model mounts the new QPL Travel lever system, a new lever mechanism that inherits the technology of Manfrotto's traditional professional 190 & 055 tripods, offering a powerful but very light solution that maximize sturdiness and compactness. The ergonomic leg angle selector can be easily operated with both hands and it allows to choose among three different leg angles, making the befree advanced extremely versatile on the most uneven terrain. Befree advanced comes with its own padded carry bag.

The Befree Live is the new-generation traveller video kit created for vloggers and mobile journalists. This new model strongly improves equipment stability when capturing footage. The Befree live mounts the M-lock solution, the new twist lock mechanism that provides the same stability and safety levels as the renowned Manfrotto lever systems, in a highly compact model. The M-lock frees up space so the head and legs fold tightly, making this tripod even more compact to carry. The fluid video head is extremely compact yet remains like Manfrotto's professional heads range that are already highly popular on the market. This fluid video head provides fluidity on pan & tilt and a sliding plate for better equipment control.

The Compact Advanced features an inventive, foldable three-way head for great stability and accuracy in framing your subject. This tripod is targeted at more advanced photo enthusiasts who own an entry level DSLR with standard zoom lenses up to 200mm. This three-way head has two independent, ergonomic levers which allows you to regulate all movements independently and thereby obtain level, well-framed images. One lever controls both pan and tilt movement whereas the second controls levelling. A unique mechanism allows the levers to be folded when the head is not in use, making the tripod easier and more convenient to carry. The high performance three-way head combined with reinforced, five-section tubes make the Compact Advanced the optimal solution for rigidity. It is available in two colours, black and white, with matching padded carrying bags.

The Compact Advanced Ball Head features a frictioned ball-head for utmost accuracy in framing subjects and sets up easily so it is immediately ready to operate. This tripod is targeted at more advanced photo enthusiasts who own an entry level DSLR with standard zoom lenses up to 200mm and high-end CSCs. This ball head is made of solid aluminium and features a friction control, which allows micro-movements without opening and closing the headlock. This characteristic guarantees an easy and safe camera positioning.

The Manfrotto PIXI EVO is the evolution of the already existing PIXI mini tripod. It has been designed as a lightweight portable solution to support cameras with larger lenses and its rich feature set provides flexibility of use, robustness and great variety of framing. PIXI EVO tripod boasts two different leg angles with a sliding selector, enabling to shoot ground level images. Indeed another great innovation is its two-section legs, adjustable in five different steps adapting to non-level surface the footprint that will give the possibility to take low light landscape and architecture pictures with the maximum stability. With PIXI EVO there is also the possibility to shoot in portrait mode, allowing the camera to tilt to 90° to capture incredible images, while ensuring great stability and precision for accurate pictures.

Smartphone Photography Accessories

Extreme Stability

Its patented twist and lock mechanism guarantees dependable security for any smartphone and enables unhindered creativity with angles and perspectives.

Portability

Compact and lightweight, TwistGrip easily slides into a pocket so it's always at hand to capture life's spontaneous moments.

MTWISTGRIP TWISTGRIP UNIVERSAL SMARTPHONE CLAMP

0,08kg max 8,2cm - 3.2in
0.18lb min 5,8cm - 2.3in

TwistGrip is a premium universal smartphone clamp designed to attach all smartphone models to any support. It is also the core element of a complete, modular photographic system.

Its high-quality construction aluminium body is 100% Made in Italy and ensures perfectly secure, sturdy support of smartphones while users focus on catching life's best moments. The clamp's twist movement and locking knob secure the smartphone in the correct position in just a few easy steps, keeping the device safe, regardless of the shooting perspective.

Manfrotto's TwistGrip has a stylish appearance, tactile finish, countless applications. Compact enough to follow smartphones everywhere, extremely versatile and designed to let mobile photographers have fun while taking better pictures: it is a must-have smartphone accessory.

- Height: 10,6 cm / 4.17in
- Width: 3 cm / 1.18in
- Depth: 1,8 cm / 0.71in

Versatility

Its 1/4" thread connection and cold-shoe mount allow easy connection to different photographic accessories for a complete photography system.

Flexibility

TwistGrip fits any smartphone size, even with most types of cases on.

TwistGrip works in multiple configurations with different photography accessories, helping to always achieve the best photo and video results.

STUNNING SELFIES

TwistGrip enables exciting new selfie angles while always keeping devices securely locked at the top of the camera pole.

ARTISTIC PORTRAIT PHOTOGRAPHY

PIXI portrait mode enables a change of perspective and the high quality LumiMuse8 LED illuminates' subjects and adds drama to portrait photography.

SMOOTH VIDEOS

TwistGrip combined with PIXI and LumiMuse6 is the ideal tool to shoot perfectly lit and still action videos, leveraging PIXI's comfortable grip and LumiMuse6's brilliant luminance.

PROFESSIONAL VIDEO SHOOTING

Video framing is always perfectly controlled thanks to the easy to use, comfortable joystick head.

Photographic Heads

The Manfrotto heads range offers a wide selection of different models to tailor the equipment according to any specific need and application. Thanks to Manfrotto's broad experience each model of head is specifically designed to effectively and efficiently satisfy the requirements of our customers, always insuring the best result. Choosing the right head is fundamental in order to get the best results, as well as considering the equipment used and the kind of photo you are going to shoot. Any photographer knows how diverse shooting situations are, varying from macrophotography to architecture, sport, portrait, panorama and many others. Within the Manfrotto head range you will always find the right solution to your requirements. Although they vary in technical solutions, materials, dimensions and payloads, all the Manfrotto heads are characterized by the same high level of quality and innovation. Excellent materials, innovative solutions and attention to ergonomic detail are common key aspects to Manfrotto heads, providing not only exceptional results but a unique shooting experience. Detail is designed to always guarantee the best way to take the best image in any situation with any equipment.

GEARED

The Manfrotto Geared heads are the most precise heads on the market. The Manfrotto geared mechanism was the first introduced in the market providing the best level of precision thanks to the millimetric control of the movement on each axis. They are the best option when maximum precision is required, for example when correcting the perspective in architectural shooting or studio still-life photography.

3-WAY

Manfrotto's 3-way heads are the best choice when controlling the camera position with a good level of precision is required. The possibility to independently control the movement in three different directions allows you to precisely set the position of the camera in all situations- when it's necessary to pay maximum attention to the image composition, like in Macro-Photography, Still-life, Art photography.

BALL

Ball heads are the most popular heads in the range, useful for all required situations especially frequently setting the camera position and taking multiple, different shots from different angles. The main advantages of these heads are multi angle versatile repositioning and fast lock and unlock action.

2-WAY

Manfrotto 2-way heads are the right choice for applications like photo/movie, birdwatching and long lenses shooting. They are the ideal tool when a fluid, smooth and controlled movement is required.

Geared Head

reddot award

MHXPRO-3WG
X-PRO GEARED HEAD

13cm 5.12in	0,75kg 1.65lb	4kg 8.8lb	200PL	Pan 360°	Frontal Tilt -20° +90°	Lateral Tilt -90° +20°

The new XPRO Geared head is the perfect combination between lightweight and precision of movement, together with a functional premium Italian design. Thanks to in body in Adapto Technopolymer, it enhances compactness and transportability, weighing only a mere 750gr/1.65lb and supporting up to 4kg/8.8lb. Combining two different movement systems, the XPRO Geared head guarantees fine-tuned compositions thanks to the geared movement of knobs rotation and a quick position changes thanks to Fast Movement Levers.

3-Way Head

MHXPRO-3W
X-PRO 3-WAY HEAD

13cm 5.12in	1kg 2.2lb	8kg 17.6lb	200PL	Pan 360°	Frontal Tilt -30° +90°	Lateral Tilt -30° +90°

The X-PRO 3 Way Head is compact, precise and reliable. Its sturdily aluminum body guarantees lightness and durability. The compact closed size that makes the X-PRO so easy to pack and carry is down to its retractable levers that can be extended when needed. Friction controls on the X-PRO 3-Way Head's tilt and portrait axes help balance the weight of camera equipment so that fine framing adjustments can be made with the locking knobs open, only locking everything down once everything's ready. And with 3 leveling bubbles on the head, composition can be levelled precisely incamera, reducing post production work.

Ball Heads

reddot award

MHXPRO-BHQ2 BALL HEAD XPRO WITH 200PL QUICK RELEASE PLATE

11,5cm 4.5in	0,5kg 1.1lb	10kg 22.05lb	200PL	Pan 360°	Lateral Tilt -90° +40°

The new XPRO Ball Head is the perfect union between innovative technical solutions and design. XPRO Ball Head features a new triple locking system which guarantees camera position stability, avoiding drifting thanks to three wedges which enclose and block the sphere. Its friction control helps the user balance the weight of camera equipment and, thanks to the two leveling bubbles, fine adjustments can be made with the locking knobs open. Moreover, its new polymer rings have substituted that unpleasant, messy grease, ensuring smooth, accurate and less jerky camera movement.

MHXPRO-BHQ6 BALL HEAD XPRO WITH TOP LOCK QUICK RELEASE PLATE

11,5cm 4.5in	0,52kg 1.15lb	10kg 22.05lb	MSQ6PL	Pan 360°	Lateral Tilt -90° +40°

Same as the MHXPRO-BH2 but with Top Lock, the MSQ6PL (Arca-Swiss compatible) is the perfect solution for experienced professionals wanting to feel totally secure, even when using expensive and heavy high-end camera gear.

2-Way Head

200PL

Pan 360°

Frontal Tilt
-60° +90°

The new XPRO fluid head, is be the best choice for photographers wanting to start shooting and for birdwatchers who are using lightweight scopes and need fluid heads that move constantly. It is the only lightweight video head with fluidity selector which allows to switch between hard and soft fluidity according to the to the movement preferred and the gear in use ensuring stable videos. Its AdaptoTechnopolymer and Aluminum body make the XPRO fluid head extremely easy to carry: weighing a mere 0,75kg/1.65lb and supporting up to 4kg/8.8lb of payload. It comes with the 200PL plate, therefore it's perfect for photographers who are already using this plate on other pure photographic heads.

XPRO monopods+

Besides the tripod, the monopod is the best way to hold a camera in situations where space is limited, the quantity and weight of the equipment carried on location needs to be kept to a minimum, or set-up speed is needed.

Correctly handled, the monopod supplies all the camera support you are likely to need even for long lenses. Because monopods are an important part of every photographer's support equipment, Manfrotto's monopod range includes many different models, considering different materials (carbon fiber or aluminum), number of sections, payload, max height, compactness.

Compatible with full fluid video base (see page 38).

MMXPROA3B
XPRO PHOTO MONOPOD BASE ALU 3 SEC

It features a smart retractable base that can be un-screwed from the last tube and open it out to greatly increase stability, only when needed. The new D-shaped aluminium tubes greatly improve the anti-rotation resistance throughout the monopod following the fast rotating movement of the photographer. That combined with the Quick Power Lock (QPL) that strongly lock the lever on the flat face of the tube, this monopod will reduce unwanted jerky movements.

MPMXPROA3
XPRO PHOTO MONOPOD ALU 3 SEC

A 3-section monopod that supports up to 10kg. The XPRO Monopod is a professional photo monopod made to satisfy all photographers that use heavy lenses mainly for sport photography and wildlife.

**MPMXPROC4
XPRO PHOTO MONOPOD CF 4 SEC**

The lightest monopod in the range. It is a 4-section photo camera monopod made for photographers that require extra height to stand out of the crowd or to master a wide range of shooting angles.

7kg 11lb	52cm 20.5in	164,5cm 64.8in	0,6kg 1.3lb

**MPMXPROC5
XPRO PHOTO MONOPOD CF 5 SEC**

It represents the perfect combination of performance and portability allowing to easily carrying it while changing spots on the field and exploit the stiffness and solidity of the carbon fibre legs. The 100% carbon fibre legs give the monopod high rigidity whilst better absorbing micro movements to ensure excellent image quality.

VIDEO SUPPORTS

Technological evolution is profoundly changing videography and its workflow. Camcorder performance continues to improve while camcorders shrink in size and become more affordable. In parallel, the latest HDSLRs combine top quality video with proven photographic capabilities. As a result, an increasing number of new users are picking up cameras, joining our world and producing fantastic results. HDSLR cameras and the latest interchangeable lens camcorders are also bringing about new demands in terms of support and accessory equipment: Manfrotto Video Products are answering these demands. Manfrotto has started offering new electronic devices to make the videographer's job easier, supporting him with traditional support systems that are all backed up by a complete range of accessories: from video camera and HDSLR remote controls to bags and carrying solutions. These are exciting times for Manfrotto: the increasing fusion of video and photo equipment and user crossover between the two worlds let us apply our experience, knowledge and leadership from the photographic sector to videography to an even greater extent. Collaborating with some of the greatest names in film and video, we're developing well-designed, high-performance, top-quality innovative products that meet and exceed the expectations of our most demanding expert users and also help set the pace of technological evolution. Whatever your own photographic and videographic background, we hope you'll find this light version catalogue inspiring and useful.

MVH500A FLUID VIDEO HEAD - 60MM HALF BALL

The new 500, which replaces the 701HDV, is a lightweight video head featuring a wider platform to accommodate both HD/SLR and interchangeable lens camcorder, as well as a sliding plate that ensures the appropriate balance even when shooting with very long lenses. The 500, the entry level of the Bridging Technology™ series, ensures smooth shots and fine control of up to 5kg of equipment. Its brand new side lock allows fast, secure and easy camera attachment. It has one Easy Link 3/8" connector to allow an external monitor or other accessory equipment to be fitted. The MVH500A has a 60mm half ball video tripod mount.

MVH500AH FLUID VIDEO HEAD - FLAT BASE

Same characteristics as the MVH500A, but with a flat base mount with standard 3/8" thread. Ideal for tripod/slider/rig/crane application.

XPRO monopods+ video

When shooting space is limited, when the amount and weight of equipment has to be kept to a minimum, when set-up speed is of primary importance, or the location is unsuitable for a tripod, a monopod is often the best solution to helping support a video camera and reduce camera shake.

New XPRO monopods+ video are a Manfrotto world-first: a patented system designed to help videographers obtain superior image quality from the kind of fluid camera movements unachievable with a standard monopod. An innovative fluidity based on spherical joint deeped into a fluid cartridge makes the user total free in terms of fluid movement, not limited to 1 axis but extended to all the possible positions (3 axes) and furthermore the new monopod can also be locked in vertical position to make panoramic rotations of the camera as smooth and judder-free as possible. The new XPRO monopods+ full fluid base also has three retractable feet, which give it firmer footing and help keep the camera stable and reduce unwanted tilt.

- **Fluid ball Joint - 3 axes fluid movement**
- **Base can be blocked in vertical position**
- **Detachable fluid base also compatible with Xpro monopods**

MVMXPROBASE FLUID BASE FOR MONOPOD

An innovative full fluid base that quickly transforms a photo monopod into a video monopod, adding the fluidity feature onto the PAN movement. MVMXPROBASE easily attaches onto the last section of a photo monopod and is suitable for all new XPRO monopods.

Sliders

The slider is one of the most useful tools to support creative achievement. Manfrotto is now offering the Slider in two versions, 60 cm (23.6 in) and 100 cm (39.3 in) in length. These new products are totally machined and their high precision ball bearings ensure an extremely smooth and precise sliding movement. Coupling between the rails and the carriage as well as the friction on the carriage itself can be adjusted simply and easily. The slider will also be available in combination with photo and flat base video heads. Multiple standard attachments are available in order to combine the slider with a variety of accessories and products such as arms and Digital Director.

MVS060A CAMERA SLIDER 60CM

In just a few simple steps and within minutes professional videographers and photographers can add the value of tracking shots to their videos, achieving a whole new level of creativity that sets them apart from other colleagues in the profession. This is a sturdy yet lightweight, extremely portable solution that's quick and easy to set up on a tripod, on the ground or any level surface. The slider gives a vast choice of shooting options while ensuring perfectly balanced friction that can easily be adjusted to tailor the creative feel of tracking shots in indoor and outdoor locations. This high-quality sturdy and steady solution is Made in Italy by Manfrotto using the best materials: fully machined anodized aluminum; high precision steel ball bearings; extra-silent, PSU - high performance polymer wheels. Numerous standard attachments enable it to be combined with accessories and products such as arms and Digital Director.

Camera Cage

Manfrotto Camera Cage is a brand new product in the Manfrotto video range that has been developed together with Wooden Camera. Created to meet the needs of independent content creators, it offers a solution to those who need to accommodate accessories on their mirrorless or DSLR cameras. The minimalist design and the lightweight structure gives several mounting points on the top and side, while leaving all of the camera's vital controls -on the right grip and left side- easily viewable. Solid and well-constructed, the product keeps your camera and accessories safely in place while shooting and is easy to carry. Manfrotto Camera Cage fits a wide range of Manfrotto and Wooden Camera products and enables the user to create numerous and diverse configurations.

- 1 Reversible top handle
- 2 ¼" threads and 2 x 3/8" thread with anti-rotation

- 1 Vertical 15mm rods with ¼" threads and to fit the handle
- 2 HDMI cable clamp to secure video cables and prevent port damage

- 1 Quick release attachment

- 1 Height adjustable 15mm lightweight rod clamp for positioning 15mm rods (only Camera Cage Large)

LED LIGHTS

Manfrotto offers a complete range line of LED lights for videography and photography, tailored on the needs of the photo-video enthusiast and professionals. Each model is designed according to state of the art technology, aiming at portability, high efficiency, durability and excellent color rendition.

LUMIMUSE

LUMIMUSE has been designed for photographers and videographers who now need a reliable, high quality lighting solution; the LUMIMUSE series of LED's offer real value for money. Cutting edge technology and performance, as well as extreme portability, put the new LUMIMUSE Series head and shoulders above other enthusiast level LED offerings.

MLUMIEPL-BK LUMIMUSE3

Mounting method	Hot-shoe and female 1/4"
Battery life	60 min
Beam angle	50°
Colour temperature	5600K
CRI (Color Rendition Index)	>92
Dimensions	28x71x53mm
Dimmable	3 step dimming
Illuminance	220
Number of LEDs	3
Weight	0.074kg

The LUMIMUSE3 is the smallest LED in the LUMIMUSE range. With such diminutive dimensions, the LUMIMUSE3 is perfect for keeping in a small bag or even your pocket to give you that extra lighting kick when you need it. It is a great multipurpose light, especially useful for videos and as fill light in photography. Also included in each kit is a snap-fit filter mount and filters, which modify the colour temperature and diffusion of the light; you can simultaneously use up to 2 to achieve various effects.

MLUMIEART-BK LUMIMUSE6

Mounting method	Hot-shoe and female 1/4"
Battery life	65 min
Beam angle	50°
Colour temperature	5600K
CRI (Color Rendition Index)	>92
Dimensions	28x76x60mm
Dimmable	3 step dimming
Illuminance	440
Number of LEDs	6
Weight	0.137kg

The LUMIMUSE6 is the middle LED in the LUMIMUSE range. With such highly portable dimensions and robust aluminum construction, The LUMIMUSE6 is perfect for keeping in your kit bag to help you get extra creative with your lighting. The LUMIMUSE6 is great in many situations for example in portrait and still life photography as well as for situations like interviews or video blogs. Using more than one together will really expand the flexibility of your lighting.

MLUMIEMU-BK LUMIMUSE8

Mounting method	Hot-shoe and female 1/4"
Battery life	60 min
Beam angle	50°
Colour temperature	5600K
CRI (Color Rendition Index)	>92
Dimensions	28x86x59mm
Dimmable	4 step dimming
Illuminance	550
Number of LEDs	8
Weight	0.175kg

The LUMIMUSE8 is the largest and brightest LED in the LUMIMUSE range but is still ultra-portable. Keeping one or two LUMIMUSE8 in your kit bag will give your portable lighting set a real kick without all the extra weight and space needed for traditional lighting. The LUMIMUSE8 is great for lighting in myriad situations with excellent maximum light output and 4 step dimming to regulate light intensity.

MLBALL BALL-HEAD MOUNT

Mounting method	Hot-shoe and female 1/4"
Weight	0.016kg

The LUMIMUSE Ball Head is designed specifically for the LUMIMUSE series LEDs and is compatible with the full range. The Ball head allow you to mount either on the hot-shoe of a camera or even on a tripod or alternative supports, using the 1/4" screw thread on the underside. The head is friction based and enables 360° pan movement and up to 35° in the vertical providing you with the ability to control the direction of your light in a simple, rapid way. The ball head is included with LUMIMUSE Kits and will be sold separately for use with other LEDs.

MLFILTERCOL MULTICOLOR FILTER KIT

Included in the kit are the following filters:

- Deep Ocean
- Deep Purple
- Blue Jean
- Azalea Pink
- Berry Pink
- Bright Orange
- Canary Yellow
- Grass Green
- Weight 0.014kg

The LUMIMUSE Series Multicolour filters are a set of accessory filters that are designed to augment the flexibility and usability of the LUMIMUSE8 and LUMIMUSE6 LED lights. The Multicolour kit provides 8 beautiful vibrant colours to help you create unique and interesting photos and videos.

MLFILTERCLS CLASSIC FILTER KIT

Included in the kit are the following filters:

- Primary Green
- Primary Red
- Primary Blue
- Heavy Diffusor
- Medium Diffusor
- Soft Diffusor
- 1/4 CTB
- 3/4 CTB
- Weight 0.014kg

The LUMIMUSE Series Classic filters are a set of accessory filters that are designed to augment the flexibility and usability of the LUMIMUSE8 and LUMIMUSE6 LED lights. The Classic series of 8 filters include a number of common lighting filters that have been used in photography & videography for many years to create various effects and corrections.

MLFILTERPRT PORTRAIT FILTER KIT

Included in the kit are the following filters:

- Pink Rose
- Pea
- Tuscan Sunset
- Summer Tan
- Amber Sunrise
- Blush
- Soft Diffusor
- Silk Diffusor
- Weight 0.014kg

The LUMIMUSE Series Portrait filters are a set of accessory filters that are designed to augment the flexibility and usability of the LUMIMUSE and LUMIMUSE Art LED lights when conducting portraiture. The kit includes 8 filters and diffusors to help mimic certain types of lighting that compliment various skin types.

Spectra2 & MicroPro2

Manfrotto's professional LED Lights are designed to meet the needs of demanding videographers and photographers. They excel in reliability and light quality and stand out from standard LED panels. These LEDs are lightweight, compact and handy; the perfect portable lighting system. Their exceptional versatility will make them an essential tool in the equipment of every professional. LED lights can be used not only on camera, but also in combination with many other supports in Manfrotto's product range.

MLSPECTRA2 SPECTRA2

Mounting method	Tripod/hot-shoe ball head and female 1/4"
Battery Capacity	AA batteries NiMH - 110 min Sony L-Type 160 min (Boost mode)
Beam angle	45°
Color Temperature	Daylight 5600K + Gel Filters (1 CTO, 1/4 CTO and diffuser)
CRI	>93
TLC	94
Dimming	1-100% without flickering
Illuminance	650lux (+50% light output with boost mode)
Dimensions	153x93x45mm
Features	Boost mode +50% light output D-Tap connection (optional) Gel Filters (1 CTO, 1/4 CTO and diffuser)

The most compact LED Panel in the professional range. Spectra2 features the state of art LED technology (Surface Mount Technology), which guarantees images with perfect colour rendition and improved efficiency. The LED panel can be operated by 6 AA standard batteries, by mains through an optional AC adaptor or by L-Type Li-ion batteries through optional battery adaptor. Compact and portable, it is perfect for on camera use (thanks to the included ball-head), but can also be used off camera. Diffuser and filter gel for colour correction are included in the pack.)

MLMICROPRO2 MICROPRO2

Mounting method	Tripod/hot-shoe ball head and female 1/4"
Battery Capacity	AA batteries NiMH - 40 min Sony L-Type 180 min
Beam angle	50°
Color Temperature	Daylight 5600K + Gel Filters (1 CTO, 1/4 CTO and diffuser)
CRI	>93
TLC	95
Dimming	1-100%
Illuminance	940lux
Dimensions	170x108x44mm
Features	D-Tap connection (optional) Gel Filters (1 CTO, 1/4 CTO and diffuser)

Powerful and compact light with newest LED technology (Surface Mount Technology), which guarantees images with perfect colour rendition. The LED panel embeds innovative lenses, which have been designed specifically to achieve an improved optical efficiency. The LED device can be dimmed from 1% to 100% and it can be operated by 6 AA standard batteries, by mains through the included AC adaptor or by L-Type Li-ion batteries through the included battery adaptor. Compact and powerful, it can be used both on camera (thanks to the included ball-head) and off camera (e.g. in combination with Manfrotto baby lighting stands). Diffuser and filter gel for colour correction are included in the pack.

Croma2

MLCROMA2 CROMA2

Mounting method	Tripod/hot-shoe ball head and female ¼"
Battery Capacity	AA batteries NiMH - 40 min Sony L-Type 180 min
Beam angle	50°
Color Temperature	Daylight 5600K - Tungsten 3100K + Gel Filters (diffuser)
CRI	>93
TLC	95 (daylight), 98 (tungsten)
Dimming	1-100%
Illuminance	Daylight: 900lux - Tungsten: 800lux
Dimensions	170x108x44mm
Features	D-Tap connection (optional) Gel Filters (diffuser)

Powerful and compact light with newest LED technology (Surface Mount Technology), which guarantees images with perfect colour rendition. The LED panel embeds innovative lenses, which have been specifically designed to achieved an improved optical efficiency. The LED device can be dimmed from 1% to 100% and it can be operated by 6 AA standard batteries, by mains through the included AC adaptor or by L-Type Li-ion batteries through the included battery adaptor. Compact and powerful, it can be used both on camera (thanks to the included ball-head) and off camera (e.g. in combination with Manfrotto baby lighting stands). Colour temperature can be regulated from 3100K to 5600K, this makes Croma2 the perfect versatile LED panel to match the existing ambient lighting. Diffuser gel is included in the pack.

ADAPTOR12V1.25A AC ADAPTOR 12V 1.25A SPECTRA2

Vouput DC	12V
loutput	1,25A

This universal 110-220V AC adaptor allows Manfrotto Spectra2 LED light to be operated by mains. An international plug set (UK, US, EU, AU) is included in the packaging.

MLBATTADT-L7.2V L-TYPE BATTERIES ADAPTOR FOR SPECTRA2

This battery adaptor allows Manfrotto Spectra2 LED light to be operated by Li-ion Type.

Manfrotto LYKOS features stand out from the crowd of standard LED panels and set a new benchmark for light quality, performance and portability. The Manfrotto LYKOS has been designed for videography, still photography and portrait photography. Combined with a dedicated softbox, LYKOS embeds high-quality LEDs with consistent colour and high performance.

MLL1500-D LYKOS DAYLIGHT

Mounting method	Tripod/hot-shoe ball head and female 1/4"
Battery Capacity	Sony NP-F970 (6300mAh) 80 min
Beam angle	50°
Color Temperature	Daylight 5600K + Gel Filters (1 CTO, 1/4 CTO and diffuser)
CRI	>93
TLC	95 (daylight), 98 (tungsten)
Dimming	0-100%
Illuminance	1600lux
Dimensions	260x152x42mm
Features	LCD Screen D-Tap connection (optional) Bluetooth technology (optional) & App Gel Filters (1 CTO, 1/4 CTO and diffuser)

LYKOS daylight is capable of an incredible lighting power in still very portable dimensions. It is the best solution for the videographer and photographer on the go, who needs a lightweight light source. LYKOS LED panels mount the newest LED technology available (Surface Mounted Technology), which guarantees images with perfect colour rendition and no colour casting. Diffuser and filter gel for colour correction are supplied in the packaging; superior diffusion can be achieved using LYKOS LED panel in combination with LYKOS LED softbox. LYKOS LED panels is fully compatible with Manfrotto Digital Director through LYKOS Bluetooth Dongle.

Dedicated App.

MLL1300-BI LYKOS BI-COLOR

Mounting method	Tripod/hot-shoe ball head and female 1/4"
Battery Capacity	Sony NP-F970 (6300mAh) 80 min
Beam angle	50°
Color Temperature	Daylight 5600K - Tungsten 3000K + Gel Filters (1 CTO, 1/4 CTO and diffuser)
CRI	>93
TLC	95 (daylight), 98 (tungsten)
Dimming	0-100%
Illuminance	Daylight: 1500lux - Tungsten: 1300lux
Dimensions	260x152x42mm
Features	LCD Screen D-Tap connection (optional) Bluetooth technology (optional) & App Gel Filters (diffuser)

LYKOS Bi-Color is capable of an incredible lighting power in still very portable dimensions. It is the best solution for the videographer and photographer on the go, who needs a lightweight light source. LYKOS LED panels mount the newest LED technology available (Surface Mounted Technology), which guarantees images with perfect colour rendition and no colour casting. Diffuser gel is supplied in the packaging; superior diffusion can be achieved using LYKOS LED panel in combination with LYKOS LED softbox. LYKOS LED panels is fully compatible with Manfrotto Digital Director through LYKOS Bluetooth Dongle. with LYKOS LED softbox. LYKOS LED panels is fully compatible with Manfrotto Digital Director through LYKOS Bluetooth Dongle.

Dedicated App.

MLLBDONGLE **LYKOS BLUETOOTH DONGLE**

LYKOS Bluetooth Dongle allows to add wireless connectivity to Manfrotto LYKOS LED panels. The device incorporates Bluetooth Smart version 4.0 (or higher) with a Low Energy Core Configuration. Downloading the iPhone App "LYKOS App", the user can have full control of one or more LED panels. Controllable functions are On/Off switch, dimming 0%-100%, colour temperature regulation, grouping of lights, recall of previously stored scene settings, fade-in fade-out.

MLSBOXL **LYKOS SOFTBOX**

Dimensions	20x24x6cm
Diffusion	-1,3 f-stops

Manfrotto LED Softbox is the perfect accessory to be used in combination with LYKOS LED panels. It can be set up in seconds without any tools. It creates a beautifully soft lighting, softening the shadows in the images. The diffuser film is specifically designed for LED Lighting and reduces the light output by 1,3 f-stops. The inner reflective surface guarantees maximum optical efficiency. It collapses flat and can be easily stored in the fabric pouch included.

Multifit Softboxes

EZYBOX PRO SQUARE, EZYBOX PRO OCTA AND EZYBOX PRO SWITCH

Ezybox Pro is a range of unique fast fit softboxes which can be used with traditional studio flash, battery operated flash guns and the Elinchrom Ranger Quadra RX range, designed to meet the demands of modern day photographers who often shoot with more than one light source. The softboxes feature a unique frame which fits directly to the Ezybox Pro Square, Octa and Switch softboxes, and then depending on your chosen light source, an adapter can then be used to attach the light source to the softbox frame, allowing the user to switch between different light sources using the same softbox. So, rather than buying different softboxes for every light you own the Ezybox Pro now offers a true 'one system fits all' solution.

Flashgun Accessories

EZYBOX SPEED-LITE 2 AND EZYBOUNCE

Ezybox Speed-Lite 2 The new Ezybox Speed-Lite 2 is the next generation of the original highly successful Ezybox Speed-Lite, which further enhances the Lastolite family of flashgun softboxes, with a complete new design and new product features. The Ezybox Speed-Lite 2 is a 22cm x 22cm compact softbox which can be attached directly onto a flashgun whether it's on camera or off camera. Used together, the inner and outer diffusers produce a 2 stop light loss, delivering unrivalled softness of light on the subject. The new fixing mechanism utilises a silicon strap in conjunction with a tensioning dial enabling the photographer to customise the fitting according to their specific flashgun, ensuring a secure fit. The Ezybox Speed-Lite 2 also features magnetic connection points making it compatible with the Lastolite Strobe gels and honeycomb grids.

FEATURES AND BENEFITS

- Inner and outer diffusers in relation to the flashgun
- A unique and secure fixing mechanism
- 30% lighter than the previous Ezybox Speed-Lite
- New folding mechanism
- Compatible with Strobe gels and grids

Ezybox Speed-Lite 2	Specifications	
	CODE	OPEN SIZE

EzyBounce The new EzyBounce bounce card is the ideal flash gun accessory designed specifically for photographers who need to be mobile and shoot quickly in demanding conditions. The EzyBounce features a number of adjustable surfaces that provide four different combinations to control the direction, shape and softness of the light and thanks to its ultra small size it can be easily carried in a shirt pocket or camera bag. It fits all standard flashguns and features an innovative silicon strap fixing system to securely attach the card to the flashgun.

FEATURES AND BENEFITS

- Foldable and super compact
- Fits to all standard flashguns
- Four different configurations thanks to the expandable surfaces
- Lightweight and sturdy
- When closed it measures only 7.5 x 8.5cm

EzyBounce flashgun bounce card	LL LS2810	7.3 x 11.3cm (4.5" x 3")

Reflectors & Diffusers

TRIGRIP

The TriGrip reflectors utilise a triangular design which provides a much stronger and stable structure. They also feature a moulded handle with a securing strap, allowing even more accurate positioning of the reflector with just one hand, which means that light can be directed to all those awkward spots e.g. under the chin and eyes without the need for stands or supports. The securing straps also allow you to support the reflector without actually gripping the handle, reducing the pressure on your wrist and fingers when held for prolonged periods.

Backgrounds

Magnetic Background Support The Lastolite Magnetic Background Support makes attaching and removing backgrounds simple. The steel band located within the rim of Lastolite backgrounds attaches directly to the two magnetic housings on the crossbar. The support can be raised to its desired position and the background simply lifted into position. The Magnetic Background Support will fit to most lighting stands with a 5/8" spigot. A kit is also available which includes a LL LS1159 light stand and carry case.

FEATURES AND BENEFITS

- Magnetic connectors
- Universal fitting
- Available as a kit
- Holds up to 5kg

FILTER SUITE

The new Manfrotto Filter Suite sets image makers free, enabling professional and amateur photographers and videographers to say goodbye to the hassle and frustration of changing filters while subjects wait, as perfect light slips away - losing the moment. With the Manfrotto Filter Suite, photographers connect the filter they need to their lens in an instant, with the utmost precision - and never miss a perfect shot.

The Lens Filter Suite is a complete system combining high-quality photography filters with easy-to-use patented Manfrotto XUME Adapters. This new game-changing solution provides a feature set that is unrivalled on the market: the magnetic coupling system gives enhanced fluidity to your workflow, saving the lost time and tedium of installing and removing your filters. It is the perfect choice for long exposures, wedding photography, macro, architectural photography, fine art photography - any style requiring the use of filters.

Manfrotto filters are available in a variety of types, including UV Protective, CPL and ND.

Each filter type is available in different versions: Essential, Advanced, Professional, ND8, ND64 and ND500. The different versions offer diverse levels of protection and performance. The double sided anti-reflection coating eliminates reflections while additional coatings provide water and dust repellency and oil and scratch resistance, making the filter easy to clean and maintain. Ultra-thin frame design makes vignetting extremely low, and a matte coating minimizes reflections. Every filter is provided with a filter case where you can store your filter and prevent accidental scratches.

To maintain our filters, blow dirt and dust with a blower or wipe with a cleaning paper or cloth. For heavy stains, use a lens cleaning liquid and cleaning cloth. Never use water or detergent for cleaning the filter.

All Manfrotto filters are available in the following sizes:

UV FILTERS

The UV filters available in the Essential & Advanced collections absorb the wavelengths that are imperceptible to the human eye but generate an increase in haze factor and changes in color tone. They can be kept on the lens permanently to protect it from scratches and dirt without altering color rendition.

The **Essential UV** filter feature 8 multi layer anti reflection coating that reduce surface reflections while water repellent coating repels effectively water droplets.

8 Multi-coated

PROTECT FILTERS

The **Professional Protect** filter is the ultimate solution for protecting your lens against pollution and damages. The filter feature a 12 multi layer coating with anti reflection, water repellent coating, oil repellent coating and unique anti static coating. Oil repellent coating allows easy wiping, which makes maintenance easier while high water repellency protects the filter from water. The unique anti static coating prevents sticking of dirt and dust caused by static electricity, so it keeps dirt and dust off and if fine dust adhere it can be easily blown off.

CIRCULAR POLARIZERS FILTERS

Circular Polarizers filters are useful in landscape photography in case you want to eliminate surface reflections from water, windows, glass and other reflective surfaces or in case you want to increase colour contrast and saturation. The polarizing effect is maximized when the direction of the sun makes a right angle with the direction of the lens.

The **Essential CPL** filter is the basic CPL filter that feature 2 multi layered coating featuring water repellent coating that repels water droplets.

2 Multi-coated Anti Reflective Water Repellent Protective Case

The **Advanced CPL** filter is the 12 multi layered filter that feature anti-reflection coating that reduces surface reflections, it repels water droplets, oil and stains. Oil repellent coating allows easy wiping, which makes maintenance easier.

12 Multi-coated Anti Reflective Scratch & Oil Resistant Water Repellent Protective Case

The **Professional CPL** filter is the ultimate professional circular polarizer filter. The filter feature a 12 multi layer coating with anti-reflection, water repellent coating, oil repellent coating and unique anti static coating. It has a 30% greater light transmission ratio than conventional polarizing filters.

12 Multi-coated Anti Reflective Scratch & Oil Resistant Anti Static Water Repellent Protective Case

NEUTRAL DENSITY FILTERS

Neutral density filters reduce the amount of light hitting the camera sensor without altering the colour of the scene they are used in a variety of situations, for example in low shutter speed photography for expressing the motion of moving object through long exposure time; to eliminate the moving object in a scene.

The **ND8** with an optical density of 0.9 reduce by 3 stops the light hitting the camera sensor, it features water and oil repellent coating for easy daily maintenance.

16 Multi-coated Anti Reflective Oil Resistant Water Repellent Protective Case

The **ND64** with an optical density of 1.8 reduces by 6 stops the light hitting the camera sensor, it features water and oil repellent coating for easy daily maintenance.

16 Multi-coated Anti Reflective Oil Resistant Water Repellent Protective Case

The **ND500** with an optical density of 2.7 reduces by 9 stops the light hitting the camera sensor, it features water and oil repellent coating for easy daily maintenance.

16 Multi-coated Anti Reflective Oil Resistant Water Repellent Protective Case

Enhance colour, contrast and saturation

Remove unwanted reflections and glare

Create Misty Seascapes

Create Serene Landscapes

XUME QUICK RELEASE ADAPTERS

Manfrotto XUME Adapters are the revolutionary magnetic solution that enable photographers to forget about filters and focus on their shots, and change filters instantly when they need to. Couple the innovative power of Manfrotto Xume quick release adapters with a full range of high quality Manfrotto filters. Getting perfect photography results has never been so easy, fast and safe. Manfrotto XUME Adapters: just “click” it! Xume quick release adapters are available in 49, 52, 58, 62, 67, 72, 77 and 82mm.

Magnetic connection

BAGS

The Manfrotto Camera Bag offering is more than just a broad range of bags: it is a complete photo carrying solution system designed to enhance the individual style of photographers while meeting their photographic needs. All Manfrotto bags share a common purpose: guaranteeing the utmost protection of photographic equipment in any type of situation while maintaining a cool looking Italian design.

PRO LIGHT COLLECTION

Designed for photographers and videographers on the move, the new Pro Light bag range offers extremely lightweight construction with maximum internal protection for your equipment, making them perfect on location carrying solution. We use only the latest innovative materials to construct the lightest camera bags on the market. At the core of each bag is the innovative Manfrotto CPS (Camera Protection System). This unique system has been specifically engineered to provide maximum protection for the most vulnerable equipment in the centre of the bag.

ADVANCED COLLECTION

Designed for photographers & advanced hobbyists who need an all rounded carry solution while keeping a touch of Italian design. Rugged durable bottom half, made by High Density Nylon Fabric, ensures trust in durability and harmonizes with the equally durable but more stylish sheen of the top. Carbon detailing ties it all in with the Manfrotto Italian heritage.

AVIATOR COLLECTION

Carefully designed to meet the high demands of aspirational aerial photographers who enjoy braving the roughest, wildest trails to discover the most beautiful places on Earth. Specific features are built to make the flying & shooting experience nicer. Structurally strong but lightweight construction makes it a perfect solution for drone pilots who are always on the move.

Camera
Protection
System

REINFORCED 3D PROTECTIVE STRUCTURE

- Brushed fabric for softer cushioning.
- 3D shock absorbing foam.
- Structural reinforcement board.

LIFESTYLE COLLECTION

Designed for photo hobbyists that care about stylish look on top of protection of the gear. These bags are the perfect combination of beauty and protection. Each bag's external appeal is accompanied by the Manfrotto Protection System inside, giving your photo gear all the protection it needs. Regardless of whether you're going on a photographic journey or not, this bag will always be the perfect companion.

MANFROTTO NX COLLECTION

Complete collection created and designed for different needs and users. With all its form factors it allows all kinds of enthusiast photographers to have the perfect bag for their daily shoots. Different carrying solutions for DSLR and CSC owners who want a lifestyle bag for everyday use. A full choice of bags that will always give the perfect solution for any situation. Available in two colours: Grey and Blue.

MANFROTTO OFF ROAD COLLECTION

Specifically designed for the outdoor world: enjoy the freedom of carrying your photo equipment and your outdoor essentials in 1 bag. Airflow back panel with light weight water resistant materials ensure comfortable carrying experience in the jungle. Dedicate protective compartment for camera with quick access design makes shooting in the wild so easy.

LINO COLLECTION

Ideal carrying & protective solution for your Manfrotto tripods & kits. Each bag is constructed by high quality abrasion-resistant material and measured to fit perfectly the latest tripod dimensions.

LIGHTWEIGHT PROTECTION

MB PL-B-230
**PRO LIGHT CAMERA BACKPACK
BUMBLEBEE-230 FOR DSLR/CAMCORDER**

Manfrotto's Pro Light Bumblebee-230 PL camera backpack is a professional camera bag designed for outdoor shooters who are always on the move. This carry-on pack is built to keep professional gear protected while providing long-wearing comfort. Its signature design Camera Protection System dividers safeguard a gripped DSLR body with 70-200/2.8 attached plus 10 lenses, or an attached 400/2.8 with 5 lenses, or a professional camcorder with accessories. The independent, "checkpoint-friendly" laptop pocket holds a 17" laptop.

Key benefits:

- Safeguards your pro gear e.g. Canon 1DX2 + 400/2.8 attached
- Breathable back & harness for extreme comfort and support
- Strong, lightweight construction for lasting performance
- Tuck-away strap system always ready to secure a pro tripod
- Waist level lens pouch for quick lens changes

MB PL-B-130
**PRO LIGHT CAMERA BACKPACK
BUMBLEBEE-130 FOR DSLR/CSC**

Manfrotto's Pro Light Bumblebee-130 PL camera backpack is a professional camera bag designed for outdoor shooters who are always on the move. This carry-on pack is built to keep professional gear protected while providing long-wearing comfort. Its signature design Camera Protection System dividers safeguard a DSLR body with 70-200/2.8 attached plus 8 lenses, or an unattached 400/2.8 with 3 lenses, or a compact professional camcorder with accessories. The center section can hold an unattached gripped DSLR body. The independent, "checkpoint-friendly" laptop pocket holds a 15" laptop.

Key benefits:

- Safeguards your pro gear e.g. Canon 5D4 + 400/2.8 unattached
- Breathable back & harness for extreme comfort and support
- Strong, lightweight construction for lasting performance
- Tuck-away strap system always ready to secure a pro tripod
- Quick and easy top access

**MB PL-BM-30
PRO LIGHT CAMERA MESSENGER
BUMBLEBEE M-30 FOR DSLR**

Manfrotto's Pro Light Bumblebee M-30 PL camera messenger is a professional camera bag designed for outdoor shooters who are always on the move. This super-roomy, slim profile bag is built to keep a professional camera kit plus a 15" laptop protected while providing long-wearing comfort. Its signature design Camera Protection System dividers safeguard a DSLR body with 70-200/2.8 lens attached plus 3 lenses, a handheld gimbal and lots of accessories. These can be taken out quickly through the top zip opening. The specially designed XtraSecure strap keeps the moving part of the handheld gimbal steady. The bag also holds a gripped DSLR kit if you are not carrying a laptop.

Key benefits:

- Safeguards your pro gear e.g. Nikon D850 + 80-200/2.8 attached
- Breathable back & quick harness adjustment
- Strong, lightweight construction for lasting performance
- Discreet opening with built-in Velcro silencer
- Holds & protects a handheld gimbal with elastic strap

Lifestyle Collection Manhattan

ITALIAN DESIGN

reddot award

The new Manfrotto Manhattan Camera Bag Collection is perfect for city commuters who are always on the move with their photographic equipment. The bags are designed to be carried even when you need to move from home to work or everywhere with bicycle, walking or other. With their urban look they will be the perfect companion for your urban daily shooting! Manfrotto's Manhattan range is made of high-quality materials, with careful attention to aesthetics - down to every detail. Designed to be highly functional, the bags effortlessly transform from photography to media carrier, comfortably holding all the equipment you need on an action-packed day around the city.

MB MN-BP-MV-50 MANHATTAN CAMERA BACKPACK MOVER-50 FOR DSLR/CSC

The Manfrotto Manhattan backpack is designed to be the perfect companion for busy urban commuters and everyday city shooting. Its extremely functional internal pouch features the new Flexy Camera Shell, the innovative protection system engineered by Manfrotto. It's big enough to accommodate your DSLR with 70-200/2.8 lens attached plus up to 4 lenses and a flash. The top part can also hold a premium Compact System Camera with mounted lens and an additional lens. You can quickly get your gear out through the secure back access or from the top of the bag. On the front, a smart sleeve connection holds your tripod or personal gear. It has two padded compartments to hold a 15.6" laptop and an iPad Pro 9.7". The best materials have been carefully selected to build this backpack: high-quality, water-repellent ballistic fabric protects your bag from scratches and the coated material on the bottom part enables you to clean it very easily.

Key benefits:

- Protective camera and laptop backpack
- Holds DSLR gear e.g. Canon 5D mark II + 70-200/2.8 attached
- Flexy Camera Shell protection inside fully adapts to fit kit
- Handy removable internal insert for extra safe gear storage
- Coated fabric for easy cleaning

MB MN-M-SD-10
MANHATTAN CAMERA MESSENGER SPEEDY-10 FOR DSLR/CSC

Thanks to its removable internal insert the Speedy 10 Messenger fits a Premium CSC like a Sony A7 or Fujifilm XT series with standard zoom lens attached plus 2 additional lenses or entry level DSLR such as Nikon D3400 or Canon Eos 1300D with lens attached plus 2 additional lenses. The new Flexi Camera Shell, the innovative protection system engineered by Manfrotto, enables you to easily turn your bag into a DSLR or CSC holder. It also fits a 12" laptop or an iPad Pro 12.9". If you want to take your tripod with you, secure it with the hidden tripod flap by simply unzipping the pocket on the coated bottom section of the bag, connect it to the front buckles to attach your tripod and you're ready to go. And thanks to the quick opening on the top, you'll never miss the moment: just open the zip, grab your camera and enjoy the shot!

Key benefits:

- Protective camera and laptop messenger
- Holds camera gear e.g. Nikon A7II kit or DJI Mavic kit
- Flexy camera shell protection for fully customizable internals
- Hidden tripod holder flap
- Handy removable internal insert for extra safe gear storage

MB MN-T-CH-20

The new Flexi Camera Shell, the innovative protection system engineered by Manfrotto, gives you the possibility to turn easily your bag in a DSLR or CSC holder. The Changer 20 fits also a 15" laptop + iPad Pro 9.7", and just changing the configuration of its handles and shoulder straps, you can have a shoulder bag, a tote or a backpack!. You can also take with you your tripod, you will find the hidden tripod flap by unzipping the pocket on the bottom coated part. Just connect it with the front buckles positioned in the front part and you are ready to go. The tripod can be easily attached to the bag.

Key benefits:

- 3 carry options: shoulder bag, backpack, and tote
- Holds DSLR/mirrorless camera gear with 70-200/4 attached
- Flexy camera shell protection for fully customizable internals
- Hidden tripod holder flap
- Nice internal removable insert for extra safe storage of you gear

Lifestyle Collection

Windsor

ITALIAN DESIGN

The Manfrotto Windsor Collection is a stylish design classic that's perfect for carrying your gear. With its vintage look, genuine leather trims and elegant fabric combination, this collection is the right choice for your field trips. The premium materials used and all the details have been carefully selected by our designers according to their unique, Italian flair for design. Trims are made of genuine leather, and fabrics are mixed to give the quintessential vintage look. The internal is enriched with a beautiful "tartan" print lining that gives to these bags a British elegant flavor.

KEY TO SYMBOLS

	Maximum height with extended center column		Single leg		Birdwatching
	Maximum height		Twin leg		Studio
	Minimum height		FLAT Flat base		Photo
	Closed length		60/75 60mm + 75mm bowl		Video
	Monopod maximum height		75/100 75mm + 100mm bowl		Travel
	Monopod minimum height		75 75mm bowl		Macro
	Head height		60 60mm bowl + half ball included		2 Multicoated
	Plate supplied with the head		75 75mm bowl + half ball included		8 Multicoated
	Pan		1 1 stage		12 Multicoated
	Lateral tilt		2 2 stages		16 Multicoated
	Frontal tilt		3 DIAMETER OF LEG 3 SECTIONS Two of the most important parameters affecting dimensions and performances.		Anti Reflective
	Weight		4 DIAMETER OF LEG 4 SECTIONS		Water Repellent
	Safety payload Maximum weight that the product can carry/support in static condition. Ability of the head to support, move and lock (with pan&tilt brakes) a certain weight		5 DIAMETER OF LEG 5 SECTIONS		Protective Case
	Counterbalanced weight Suggested maximum weight that the product can properly balance. It indicates the working (dynamic) payload, without the help of tilt brake				Scratch & Oil Resistant
	Opening range				Anti Static

Drone

90° COLUMN

The horizontal column mechanism, hidden in the top casting, allows the tripod to smoothly reach, with one-finger operation, whatever camera position you have in mind.

QPL

The Quick Power Lock levers provide extreme locking grip and can be released with one hand and a single movement, drastically reducing set up time.

EASY LINK

The attachment in the top casting allows the tripod to expand the shooting holding accessories, and turning it into a mobile studio.

LEVELING BUBBLE

The basic but essential way to place your tripod/head system in the right position.

QUICK RELEASE

The head plate allows to quickly fix and release the camera without risks of vibration or slipping.

BALL FRICTION

The friction of the ball head can be adjusted to safely control the camera movement.

FRICTION CONTROL

The friction controls help the user to balance the weight of camera equipment allowing fine framing adjustments when the locking knobs are open.

RETRACTABLE LEVERS

The patent pending retractable levers can be extended when needed, ensuring compactness when not in use.

MICRO ADJUSTMENT

Geared system for a very fine adjustment of the camera position.

RELIEF & CONTROL SYSTEM

Geared heads are the most accurate 3-way heads in the market thanks to a slow and precise movement. In order to avoid being too slow in some instances, the heads feature the Relief&Control System that allows you to temporarily disengage the gears for an ultra-fast repositioning.

90° - 105° PORTRAIT SELECTOR

On a perfectly leveled tripod photographers look for a perfectly vertical 90° portrait position. On a not perfectly leveled tripod a portrait position with a wider 105° movement is desirable. With the unique 90°-105° portrait angle selector photographers have both options in a single head.

FLUID CARTRIDGE

The system for having smooth and regular movements when using video cameras. A special fluid cartridge is used in order to avoid direct friction between surfaces, providing better control and constant movements. A required technology for heads and monopods coupled with video cameras.

CARBON FIBER

Manfrotto's carbon fiber tubes reach the highest quality standards and performance. They provide an outstanding rigidity and lightness. Carbon fiber tubes can be produced with very different processes, generating products with different levels of quality. Manfrotto chose to reach the maximum quality using 100% carbon fiber and the pull winding technology. This production process is able to maximize performance, resistance and reliability.

MAGNESIUM

Magnesium is a light metal, with two thirds the density of aluminum. It's a good material for having good mechanical properties reducing the weight in medium volume components and parts.

ALUMINUM

One of the most popular materials for light weight structures. The Manfrotto's aluminum is selected with the highest quality criteria in order to provide the required performance in terms of reliability, lightness and stability.

ADAPTO®

The polymeric parts of the Manfrotto products are made with the highest quality standards for providing the required mechanical resistance and reliability.

CBS

CBS is our Counterbalance System; a fundamental part of what makes our video heads such useful video tools. The principal function of CBS is to cancel out the slow falling effect seen in video footage when the videocamera's own weight causes it to tilt forward or backward on an unbalanced video head. CBS ensures that the cameraman need only apply minimal effort to the head's pan bar to move the camera precisely and smoothly.

FDS is a friction system used across the Manfrotto video head and monopod ranges, based on specially developed cartridges that make movements fluid and help stop unwanted vibrations (such as those from the video operator's own hand) being transmitted. Our range uses two types of FDS: fixed and variable. Variable FDS allows you to regulate and control the level of friction applied based on the type and style of video you're shooting, on the weight of your camera equipment and on climatic conditions and temperature.

FLUID TECH

Fluid ball Joint - 3 axes fluid movement
