

SanDisk Extreme® CompactFlash® card

Highlights

- **Extreme high speed** at up to 60MB/sec read/write speeds (400X, UDMA-enabled)
- **Extreme capacities** of 8GB, 16GB and 32GB** CompactFlash® cards
- **Extreme intelligence** of SanDisk's proprietary Power Core™ controller distributes data across the card more rapidly and efficiently
- **Extreme durability** SanDisk Extreme cards feature RTV silicone coating for added protection against moisture and humidity
- **Extreme confidence**, backed by rigorous stress, shock, and vibration testing procedures and a limited lifetime warranty†
- **Extreme reliability** tested to perform from -25°C to 85°C (-13°F to 185°F)

Get exactly the shots you want with professional-grade SanDisk Extreme® CompactFlash® cards. With up to 60MB/sec* read/write speeds, you'll see it takes more than a great digital SLR camera to bring your ideas to life. And with up to 32GB** of space, you'll have room to capture it all in RAW+JPEG, and save the editing for later.

SanDisk engineered its Power Core™ Controller to take whatever your camera's buffer can dish out. By distributing image data across the card more rapidly and efficiently, this card delivers professional performance.

For improved reliability and endurance, the SanDisk Power Core™ controller's firmware algorithms through wear leveling enhance endurance of the card. The Power Core controller's ECC engine has improved 4X over its previous generation thereby enhancing overall reliability of the card.

Best-in-class quality assurance backed by rigorous stress, shock, and vibration testing procedures and our limited lifetime warranty. Cards include RTV silicone coating for added protection against moisture and humidity.

As a world leader in flash memory cards, SanDisk leverages its end-to-end integration, from the silicon wafer to the hardware and software, to optimize memory die for its high-performance CompactFlash cards.

That's why so many professional photographers look to SanDisk for the performance they need. Learn more at SanDisk.com.

SanDisk®

Included in package

- Memory card
- Plastic jewel case

SanDisk Extreme® CompactFlash® card Specifications	
Write performance	Up to 60MB/sec (400x)*
Read performance	Up to 60MB/sec*
Capacities	8GB, 16GB, 32GB**
UDMA	UDMA-5 enabled (works in all UDMA modes)
Power Core Controller™ & Enhanced Super-Parallel Processing™ Technology (ESP)	Was invented by SanDisk to increase the card's performance level.
Temperature	Tested to perform from -25°C to 85°C (-13°F to 185°F)
Specification	Meets CFA Specification Type I Card
Durability	Tested for shock. RTV silicone coating for added protection against moisture and humidity
Warranty	Backed by rigorous stress-testing procedures and our limited lifetime warranty† (30 years in certain countries)
